

Research Fellow in Energy Economics

The non-university research association Energieinstitut an der Johannes Kepler Universität Linz seeks to hire a graduate researcher with strong quantitative skills for economic analyses in the energy system.

JOB DESCRIPTION

Energieinstitut an der Johannes Kepler Universität Linz
Department of Energy Economics,
Place of work: Linz, Austria
38,430€ per annum / open-ended contract

The Energieinstitut conducts research projects either funded by national Austrian institutions or European funds, and you will be involved in several of these projects at the same time. These projects deal with a wide variety of energy-related topics, including macro econometric models of the economy on different regional scales, the development and implementation of household surveys and survey experiments, and the handling, aggregation and interpretation of large data sets, to name just a few. To give you an impression of the research activities of the Energieinstitut we reference you to two of our latest projects www.storeandgo.info or www.peakapp.eu.

However, besides scientific work the job also requires supporting the senior team members on the administrative level, like the organisation of meetings and workshops, the preparation of the minutes thereof, the preparation of progress reports to funding bodies, or formatting of working papers, technical reports, or books.

For an informal discussion please contact Johannes Reichl at E: reichl@energieinstitut-linz.at or T: +43 732 2468 5652 or Andrea Kollmann at E: kollmann@energieinstitut-linz.at or T: +43 732 2468 5660.

To submit your application, please use office@energieinstitut-linz.at.

Closing date for receipt of applications: 30 June 2016

Expected interview date: summer 2016, date will be agreed upon your availability

DESIRED SKILLS AND EXPERIENCE

You will have a degree enabling you to conduct comprehensive quantitative research in economics. You should have a high degree of competence in planning and executing research, coupled with an ability to work in multi-disciplinary teams.

Language skills in German and existing knowledge of energy economics and the energy system are advantageous, but are not prerequisite.

ABOUT THE EMPLOYER

The Energieinstitut an der Johannes Kepler Universität Linz is a highly distinguished research institution whenever multidisciplinary knowledge of more than one scientific field is essential for energy-related research topics. Our three departments cover Energy Economics, Energy Law and Energy Technologies.

Currently, our team of 25 researchers (full time equivalent) is involved in about 30 national R&D projects, 2 cooperation projects in the Internationalen Energy Agency, and 5 projects funded by the European Commission.
